

Some Resources for Testing and Accessibility:

Accessibility: [Accessibility Checker - ADA & WCAG Compliance \(Free Scan\)](#)

Pro

- only requires url
- Free and simplistic
- Checks both ADA and WCAG

GSA Accessibility (Governmental) : [Federal website standards](#)

- Pro:Free, simplistic and uniform to all other gov websites
- Con: Must plan to evaluate your compliance with the three pending standards.

Accessibility To Do Before Testing:

-Alt text for images

Ex: HRDC logo

-add translate option to all text (a feature that exists on google already?)

-form intro labels

-the search bar needs one!

HCI Testing: This format can work both in person and remote

Test Action	Able to complete (Y/N)	Issues and or Confusion
